Sprint Overview

U.S. Department
of Veterans Affairs

Sprint Focus

Engineering:

- Complete the necessary content updates to the Overpayment and Copayment initiative, prepare to release these separately within the app and work on BE analytics.

UX:

- Complete the synthesis for One VA Debt Letter and share the research readout with the MFS team.
- Continue the user flow and designs for the email verification on the mobile app.

U.S. Department
of Veterans Affairs

Key Wins

- Worked through the Shutdown Codefreeze approvals
- 1 VA Debt Letter research readout

Dave | Google Wallet PoC Fixes for VSC

- **Issue**

- Our Google Wallet proof of concept for VSC failed to function

- **Solution**

- Set up test email account and added SHA-1 to Google Wallet API Console
- Adjusted pass class to match UX and correctly define card template/details
- Adjusted backend creation of pass object to make use of new pass class
- Modified VA mobile app to handle “Open VA mobile app” deep link
- Tested on a real Android device, which is required (emulator doesn’t work)

U.S. Department
of Veterans Affairs

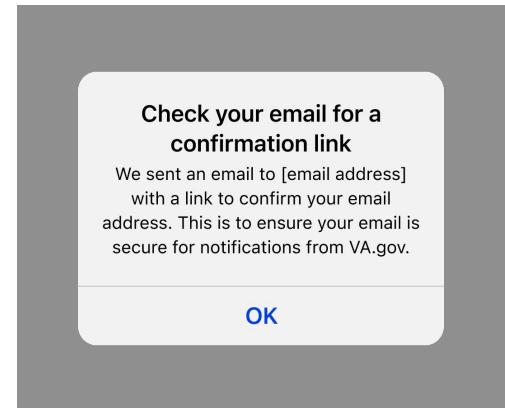

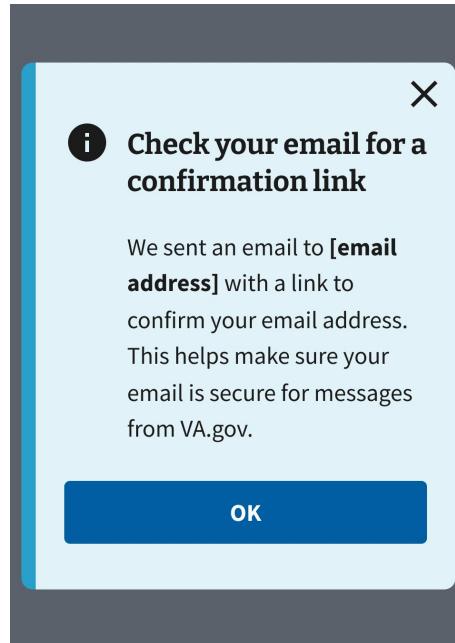

Natasha | Email Verification

- **Overview**

- Ensure the email VA uses for communications is actively monitored
- Users will only have to confirm their contact email if it's different from their identity email

- **Work completed**

- Color-coded user flows
- Worked with Janelle and Rory on email content
- Created designs and worked on prototyping flows

Up Next

Next Sprint Focus - Sprint 33

- Complete the necessary content updates to the Overpayment and Copayment initiative and prepare to release these separately within the app.
- Continue work on the API refactor of the Veteran Status Card and build the BE mobile endpoint utilizing the new shared service and mock up the new messages that a Veteran would receive if they were not able to get a Veteran Status Card.
- Prepare for the GHEC-US migration to ensure that the MFS team understands the process.
- Begin to identify folks that we would want to conduct UAT for overpayment MVP and create a list of items to test with them.
- Continue creating the designs for the email verification on the mobile app and attend Design Critique for feedback.

U.S. Department
of Veterans Affairs

Noted Risks and Dependencies

- External team PR reviews may take longer than expected and are outside of our control.
- The Holiday Code Freeze will impact the team's ability to deploy code; however, we will have stories wrapped up to the point of being able to hand them off, once the code freeze is lifted
